

ABOUT US

Matter + Energy helps government and enterprise clients streamline operations, optimize IT performance, and drive innovation securely and efficiently. Our commercial off-the-shelf (COTS) offerings span artificial intelligence, data platforms, automation, and IT cost optimization, enabling modern and mission-ready digital operations.

SOFTWARE CATEGORIES

Artificial Intelligence (AI): Unlock faster, smarter decisions through explainable AI

- Text Intelligence: Extract insights from unstructured documents, reports, and communications.
- Predictive Modeling: Anticipate risks and outcomes across operations, supply chains, or constituent services.
- Conversational AI: Automate citizen engagement or help desk tasks with intelligent digital assistants.
- AI Lifecycle Management: Govern model development and performance across teams and missions.
- AI Coding Assistant: Accelerate application and workflow development with an AI-powered code assistant that supports multiple programming languages.

Data Management & Analytics: Build trusted data ecosystems for informed decisions

- Unified Data Platform: Connect and access data across cloud, on-prem, and hybrid systems.
- Data Governance & Privacy: Maintain transparency, compliance, and access control over your data.
- Query Anywhere: Analyze structured and unstructured data using open formats.
- Self-Service Data Prep: Empower teams to clean and explore data without coding.

Automation: Modernize workflows and free up staff for higher-value work

- Process Automation: Digitize repetitive tasks across operations, finance, and HR.
- Document Intelligence: Digitally capture, classify, and extract data from forms and files.
- Workflow Orchestration: Design and monitor cross-functional business processes.
- Real-Time Triggers: Automate system responses to key events or thresholds.
- Employee Orchestration Platform: Streamline employee workflows, requests, and tasks through a unified orchestration experience.

Business Intelligence & Reporting: Deliver insights at the speed of mission

- Interactive Dashboards: Visualize key performance indicators across programs.
- Open Data BI Tools: Explore and share real-time metrics with decision-makers.
- Data Storytelling: Enable insights through easy-to-use reports and visualizations.

SOFTWARE CATEGORIES

IT Financial Management (Technology Business Management): Align technology investments with mission priorities

- IT Cost Visibility: Track spend across cloud, infrastructure, and software portfolios.
- Optimization Insights: Identify opportunities to right-size and modernize IT operations.
- Budget Accountability: Enable chargeback, forecasting, and planning across departments.

Sustainability & Infrastructure Intelligence: Operationalize environmental responsibility and asset performance

- Asset Management: Monitor and maintain infrastructure for energy and cost efficiency.
- Sustainability Insights: Track energy use, emissions, and water usage in real time.
- Carbon Accounting: Automate emissions tracking and support compliance disclosures.
- Predictive Maintenance: Reduce energy waste and downtime with data-driven operations.

Microsoft Licenses

- Office Productivity: Document creation, spreadsheets, presentations, and email
- Collaboration & Communication: Real-time collaboration via Teams, Outlook, SharePoint, and OneDrive

CLOUD SERVICES

Amazon Web Services (AWS)

- Enterprise cloud infrastructure and AI services (Includes AWS GovCloud)

IBM Cloud

- Hybrid cloud platform with built-in AI, security, and automation (Includes IBM Cloud for Government)

Microsoft Azure

- End-to-end enterprise cloud with strong integration across Microsoft services (Includes Azure Government)

KEY FEATURES & BENEFITS

- Modular & Interoperable: Works with your existing tech stack
- Compliance-Ready: Designed with FedRAMP, CMMC, and ESG frameworks in mind
- Cloud-Enabled: Deployable on multi-cloud, hybrid, or on-prem environments
- Scalable & Secure: Built for growth and government-grade protection

Get Started

Whether you need to modernize legacy systems, reduce operating costs, or meet compliance goals—we can match the right technology to your mission.
